

## ROSÉ SEMI-SPARKLING ITALIAN ROSÉ WINE

### WINEMAKING

Two varieties of grapes are combined and crushed with light maceration on the skins for 4/5 hours at a temperature of 10°C. After a partial decanting, the must is fermented with selected yeasts at a controlled temperature of 16-18°C. After this phase, the wine is placed in stainless steel tanks. To make it sparkling, a second fermentation takes place in a pressurized tank with specific yeasts that enhance the aroma.

### TASTING NOTES

Semi-sparkling wine with the delicate colour of a rose petal and pleasant fragrances of banana and cherry.

### PAIRING

It goes well with a wide variety of modern cuisine. Also excellent as an aperitif. Serve cold at 8°C.

### PARTY LIKE AN ITALIAN

A selection of fresh, light semi-sparkling wines obtained thanks to a vinification that enhances aromas and fragrances. Excellent for aperitifs, brunches and family toasts.
